CANNABIS SATIVA SUCCESSFULLY FIGHTS SKIN PROBLEMS FROM SLOVENIA TO JAPAN

Hemptouch is a Slovene independent CBD oil and skin care brand, specialized in making hemp-based therapeutic balms, wonderfully moisturizing face creams and skin-friendly shampoos and cleansers. Inspired by powerful Cannabis Sativa plant, Hemptouch's therapeutic natural remedies soothe and calm different types of skin problems.

Unique trilogy of Cannabis sativa extracts brings relief to troubled skin

Cold pressed hemp seed oil

Hemp oil is a perfect source of essential fatty acids and vitamin E. The unique composition of the oil moisturises the skin deeply, and the non-comedogenic structure does not close pores, therefore the oil is also suitable for the care of greasy and combination skin.

Hemp hydrolate

Cannabis hydrolate is the most mysterious of the hemp ingredients. This rare flower water accelerates microcirculation, stimulates skin and improves the appearance of pores.

CBD cannabinoid

This complex active ingredient in industrial hemp provides relief for skin, returns its natural balance and helps vigorously protect it. It calms redness, various skin reactions and itching and stimulates renewal of skin cells.
